DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6, drawn to a packed column, classified in class 261, subclass 97.
- II. Claims 7-11, drawn to a method of treating a polymerizable liquid, classified in class 562, subclass 600.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process as claimed can be practiced by a materially different process. For example, an easily polymerized material such as methacrylic acid can be fractionated and purified by distillation through an unpacked distillation column.

Because these inventions are distinct for the reasons given above and the search required for Group I is not coextensive with that required for Group II, restriction for examination purposes as indicated is proper.

A telephone call was made to Frank P. Presta on 18 November 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
